Dr. Robert A. Kehoe
Kettering Laboratory of
Applied Physiology
Eden Avenue
Cincinnati, Ohio

Dear Dr. Kehoe:

Thank you very much for sending us your additional comments on the specific question I raised in connection with the draft of our standard for minimum age for employment in industries with exposure to lead. I am glad to know that you believe the original statement of Item 4 was satisfactory and that it does not require any addition.

In these brief leaflets we do not, of course, want to make any unnecessary additions to the items listed, and we intend, therefore, to let Item 4 stand as it was originally expressed.

May I again express our appreciation to you for the assistance you have given us.

Yours sincerely,

William M. Schmidt
