

1 Q So if you had grease on the floor, then the
2 fiber would hit and it might set?

3 A It would, sure. Certainly would.

4 Q Do you recall in your review of I think Mr.
5 Carter's testimony during the 1952 period they also
6 washed vehicles in the garage?

7 A Yes.

8 Q Would that have any effect on --

9 A Ordinarily -- I guess it meets my test for
10 not speculation. I will say it and you can decide.

11 Q Okay. That is fine.

12 A My assumption is that there would be a
13 special place where you wash the cars. That is the
14 way it is in every other garage I am aware of.

15 You don't just wash them all over the place
16 and surely wouldn't wash them where you are doing
17 brake works because wet brakes is real bad.

18 Q Okay. I accept that.

19 Assuming the fiber got to the place where
20 the washing was going on, that might limit its ability
21 to get back up into the air; is that right?
