GAF Commercial Asbestos Paper

As a fire retardant with all the properties of a thin, pliable paper, GAF Asbestos Paper has a multiplicity of uses in residential and general building work and in industrial applications. It can be used to wrap furnace pipes, air-conditioning ducts, furnaces, jackets and for the protection of wood partitions exposed to heat. This product is ideal for any application where paper is desired and a degree of fireproofing is required.

It has a minimum of organic material mixed with pure asbestos fibers to provide added strength to the sheet. Length of fibers and their orientation assures the physical characteristics that contribute to the quality desired in an asbestos paper regardless of the thickness that may be selected for general commercial uses. Special grades of asbestos paper can be supplied which will withstand higher temperatures.

Specifications

Approximate Thickness	Approximate Weight per 100 Sq. Ft.	Average Sq. Ft. per 100 lbs.
015	6 lbs.	1660
019"	8 lbs.	1250
.022"	10 lbs.	1000
.027"	12 lbs.	830
.029"	14 lbs.	710
032"	16 lbs.	625
1/16" (.0625")	30 lbs.	333

(Actual weight of Asbestos Paper may vary ± 10%)

Available in standard rolls of 25, 50 and 100 lbs., either 18", 24" or 36" wide. Special widths available on request.

GAF Asbestos Rollboard

Asbestos Rollboard is basically the same product as the Asbestos Paper, except that it is made in thicknesses of 1/8" and 3/32". Used for general fire-proofing and heat resisting purposes, it will withstand temperatures up to 350° F.

Specifications

Approximate Thickness	Approximate Weight per 100 Sq. Ft.	Average Sq. Ft. per 100 lbs.
3/32"	50 lbs.	200
1/8"	70 lbs.	145

(Actual thickness Asbestos Rollboard may vary ± .02")

GAF Asbestos Millboard

GAF* Asbestos Millboard is made of selected asbestos fiber combined with suitable binding materials to produce a densely compressed sheet of uniform size and thickness. To prevent warping, the sheet is carefully cured and dried. It can be obtained in several different styles with either a smooth or a pin-pointed, embossed finish.

Asbestos Millboard is designed to be used wherever a light-weight, inexpensive fireproofing material is required. It is employed widely in insulating ovens and ranges and for lining grates, ceilings and walls. Its many residential and industrial uses are apparent when it is considered that the product is fire retardant, vermin proof and can be used as protection against acid fumes.

GAF* Millboard is of the "smokeless" type. Under heat it will not give off offensive, pungent gases or odors and while it may discolor slightly at higher temperatures its strength is not materially impaired. It can safely be used with temperatures as high as 1000° F.

The soft, medium and hard grades are made to cover the wide uses to which millboard is put. While medium grade is standard and is furnished unless otherwise requested, soft quality satisfies the requirements when some flexibility is required. The hard quality is stiff and brittle. It is used when rigidity is a requirement.

Types Available

Standard Finish		Embossed Finish	
No. 100—soft	No. 102—extra hard	No. 200—soft	No. 202—extra hard
No. 101—medium		No. 201—medium	No. 211—special gasket stock

Note:—All orders should definitely specify type of finish and grade desired.

Specifications

Thickness	Average Weight per Sheet	Average Weight per Sq. Ft.	Number Sheets per Case	Number Sheets per Carton
1/16"	4.3 lbs.	.31 lbs.	80	24
1/8"	8.5 lbs.	.61 lbs.	40	12
3/16"	12.5 lbs.	.89 lbs.	28	8
1/4"	15.5 lbs.	1.10 lbs.	20	6
5/16"	19.3 lbs.	1.38 lbs.	16	5
3/8"	22.1 lbs.	1.58 lbs.	13	4
1/2"	29.1 lbs.	2.08 lbs.	10	3

Asbestos Millboard is furnished in one standard size, 42" x 48", but is suitable for cutting to any size desired. Other sizes available upon request.

(Actual weight of Millboard may vary ± 10%)

Dimensions of carton 48 1/2" x 42 1/2" x 1 5/8", dimensions of crate 48 1/2" x 42 1/2" x 5 1/4"

GAF Asbestos Electrolytic Paper

This special long fiber asbestos paper is specifically manufactured for chlorine manufacturers using the electrolytic cell process. It is available only upon special order.
