Office of Pollution Prevention and Toxics
1200 Pennsylvania Avenue
Mail Stop 7401M
Washington, DC 20460

MR 265899

Re: **Voluntary Commitments in the PFOA Users Letter of Intent**

Dear Mr. Auer:

One of the commitments made in the PFOA Users Letter of Intent, dated March 14, 2003, was for each of the signatories to provide EPA with a list of each site in the United States at which APFO is used to make fluoropolymers, and to list which fluoropolymers are made there, including the CAS number of that fluoropolymer.

This letter contains that list for Dyneon LLC. The only U.S. site at which we manufacture fluoropolymers is located at 1400 State Docks Road, Decatur, Alabama

As of April 8, 2003, Dyneon manufactures the following fluoropolymers at this plant using APFO (CAS No. 3825-26-1).
