Industrial Relations Objectives - 1977

Revisions to the 1977 objectives have been completed with the exception of facility OSHA incident and frequency rates. A revised copy is attached.

Following is a status report on accomplishments against these objectives.

I. Safety

The facility has operated with no lost-time injuries or major fires. Accomplishments are reflected in the following:

- Development of the Industrial Health Coordinator in the Safety area is progressing well.
- A new seminar safety training approach for 1977 was developed and implemented.
- Coordination of CCC fire training at Texas A&M has been completed.
- A work order has been submitted to define requirements, cost, and approvals for a fire training facility at CCCTC.
- The facility emergency plan has been updated and emergency drills conducted to test same.
- An Occupational Health Program was developed and submitted for facility approval.
- Participation in OSHA Committee work resulted in recommendations for facility ground fault protection and laboratory exhaust ventilation action plans.
- A Safety central file system was developed and implemented for OSHA and Safety records.
- The department has substained an OSHA incident and frequency rate of zero.

II. Personnel Administration

- Line managers were involved in the development of AAP hiring goals.
- Contact was established with two minority community organizations.
