Dear Dr. Fancher:

Confirming my telephone conversation, please proceed with the study on the chickens as outlined in your letter of January 17, 1969.

Your letter did not mention using any controls. Would you please include 4 birds in the 7-day study and send samples of these to us along with the organs, feathers, etc. of the birds from the feeding study.

Best personal regards.

Sincerely,

Elmer P. Wheeler
