Bill Corlew - KRUMMRICH

The visit to the W. G. Krummrich Plant and tour of your Aroclor unit last Friday was very informative and appropriately timed.

The Krummrich Aroclor team should be complimented for the obvious progress that is being achieved in controlling loss of Aroclors to the environment. I am favorably impressed with the understanding, concern and dedication to succeed that I found in talking to supervisory and operating personnel.

Management decisions to appropriate additional capital to your Plant for the liquid incinerator, reclaiming facilities, containment facilities and a distillation unit are positive signs that your plant is considered capable of performing and will become an increasingly important factor in our struggle to survive in the Aroclor business.

Keep up the good work. If I can help, let me know.
