MEMORANDUM

June 5, 1973

TO: S. D. Weaver

FROM: Richard E. Lowe

The enclosed "Environmental Expenditure" sheet for CAPCO is a compilation of pollution control expenditures (air and water -- both capital and operating) for your plants at Ragland and Van Buren.

This information was submitted by Messrs. Jackson and Gerth to J. D. Montague in mid-March.

Appreciate your review to determine that it is accurate and includes all costs which we have determined should be included (see Guidelines attached).

Your response by June 15th will be appreciated.

Dick

GUIDELINES FOR COMPUTING

ENVIRONMENTAL EXPENDITURES

Capital Expenditures:

--- Cost for equipment whose sole purpose is pollution control with no significant return on capital expended.

--- Cost for equipment whose primary purpose is pollution control with some financial return but not enough to justify expenditure (these systems would show a return on investment of less than 20% before taxes).

--- Only that portion of the cost for equipment (installed mainly for reasons of economy) which provides pollution control benefits.

Operating Expenditures:

--- Charges for power, chemicals, utilities, maintenance, monitoring, supervision and labor.

--- Charges for taxes, and amortization.

--- Payments to public agencies (discharge or user fees, surveillance, etc.).
