Mr. W.M. Oughtred - Asbestos Corporation Limited
Mr. F.P. Smith - Bell Asbestos Mines Limited

Dear Sirs:

At the meeting of the Quebec Asbestos Mining Association held in Montreal last Friday, it was agreed that I would circulate the alternative wording proposed by our Company's Counsel with respect to any label or imprint that might be used on bags containing chrysotile asbestos fibre, and I now append such suggested wording below:

"CAUTION

This bag contains chrysotile asbestos fibre. Persons exposed to asbestos-dust should use adequate personal protective devices as inhalation of asbestos-dust over long periods may be harmful"

You will also recall that it was our impression that in the opinion of our Counsel, legal liability might be equally avoided by having such cautionary wording appear on the invoice or other sales documents.

Yours sincerely,

I.C. Campbell
Vice-President & Secretary-Treasurer
