Abex objects to this interrogatory on the grounds that it assumes the truth of matters not established or matters not in evidence

Abex also objects to this interrogatory on the ground that it is speculative inasmuch as it fails to distinguish among raw asbestos, asbestos contained in building insulation products and/or asbestos-containing automotive friction products, and/or among the different types of asbestos fibers. Because the asbestos fiber contained in Abex's asbestos-containing automotive friction products was chrysotile, the only type of asbestos Abex ever used for product production, which was resin-bonded and encapsulated, proper use of such products did not create or contribute to any adverse health effects

Abex further objects to this interrogatory on the ground that it seeks to impose upon Abex a legal duty or obligation to which it was not subject.

Subject to and without waiving these objections, and insofar as it understands this interrogatory, Abex discontinued the manufacture and sale of asbestos-containing friction products in 1987 and no longer operates any friction product manufacturing facilities. There are no current Abex employees, officers who worked for Abex, or directors who sat on its Board during the period Abex manufactured and sold friction products with personal knowledge of the information contained in all the records and documents that might be responsive to this interrogatory.

The available information, from which Abex would prepare a response to this interrogatory, is contained in files and records maintained by Abex. To prepare a response to this interrogatory would necessitate the preparation or the making of a compilation, abstract, audit, or
