Mr. Richard Davis
St. Louis

Yesterday, Mr. Allen of the subject company called and stated he had two employees nauseated from exposure to a leak in a heat transfer unit that used Inceclor 1248. One individual was under the care of a physician and the physician suspected liver damage although no jaundice could be seen (patient a negro) and was not hospitalized.

I told Mr. Allen to call me or have a doctor call me if they needed any further information.

It might be that you will want to alert the New York Office about this case.
