D. H. Hall
Cleveland OTM-3

At the time of BFG's move to decentralization and efforts at budget reduction, we questioned the Chemical Group about participation in trade association activities. Among other replies we were informed that participation in the Health and Toxicology Committee of the Chlorine Institute was not desired.

This department did not budget for this in 1986 or 1987 and might have a problem participating in committee activities. What is your current opinion on the need for BFG representation on this particular committee? There has been no activity from this department since the retirement of Dr. Maurice N. Johnson.

Dear Dr. Dietz;

It is a pleasure to inform you that you have been appointed a voting member of the Health & Toxicology Committee of the Chlorine Institute effective immediately. You will be replacing Morris N. Johnson, M.D. as BFGoodrich's representative. As a voting member, you are expected to participate in all scheduled meetings of the committee.

We are pleased to welcome you and look forward to a mutually enjoyable and valuable association through your participation in the committee's activities. If you have any questions, please don't hesitate to call me.

Yours truly,

Robert G. Smerko
