so that they don't meet the standard as being something toxic.

Q We will get to that in a minute.

Now, with respect to the amount of brake wear dust, I think you have testified before it is about a spoonful in a typical brake drum?

A How much would be within a brake drum? Yes, a teaspoonful, unless it is a truck brake, that is about the right sort of magnitude.

Q Is it fair to say, and I think you said before, the width of one human hair if it were asbestos could contain about a million asbestos fibrils?

A Chrysotile fibrils, yes, that would be correct.

Q So in the 1 percent of asbestos in the spoonful, that could be a couple of million at least?

A No, that is nonsensical.

This is a "ducks and apples" things you are making reference to.

Q Sure.
