

49. Prevention of bleomycin-induced pulmonary fibrosis in the hamster by cis-4-hydroxy-L-proline. D.J. Riley, J.S. Kerr, R.A. Berg, B.D. Ianni, G.G. Pietra, N.H. Edelman and D.J. Prockop, Amer. Rev. Resp. Dis. 123:388-393, 1981.
50. The effect of positive end-expiratory pressure (PEEP) ventilation on cerebrospinal fluid pressure and cerebral blood flow. D.D. Doblar, T.V. Santiago, A.U. Khan, D.J. Riley and N.H. Edelman, Anesthesiology (in press).
51. Hypoxic arousal in the intact and carotid chemodenerivated sleeping cat. J.A. Neubauer, T.V. Santiago and N.H. Edelman, J. Appl. Physiol.: Respirat. Environ. Exercise Physiol. (in press).
52. Brain hypoxia and control of breathing: Role of the vagi. R.W. Chapman, T.V. Santiago and N.H. Edelman, J. Appl. Physiol.: Respirat. Environ. Exercise Physiol. (in press).
53. Beta-aminopropionitrile prevents bleomycin-induced pulmonary fibrosis in the hamster. D.J. Riley, J.S. Kerr, R.A. Berg, B.D. Ianni, G.G. Pietra, N.H. Edelman and D.J. Prockop, Amer. Rev. Resp. Dis. (in press).
