DOCUMENT DESCRIPTION: Memo RE Asbestos Exposure of Four Employees

Paul Schwerle - Berlin

Jon L. Konsen, M.D. - Toledo

July 1, 1969

ASBESTOS EXPOSURE
OF FOUR EMPLOYEES

Attached is an appraisal by Mr. William Bradley of the work exposures to asbestos of Chester Morrison, Fred DiStefano, Floyd Rogn and Harry Copeland. With the exception of Chester Morrison, the other three individuals' exposure to asbestos is at a level which would not be expected to cause asbestosis.

The observations and suggestions that Mr. Bradley makes are reasonable and are in accord with my comments to you during my last two visits.

Once Dr. Paisley has had an opportunity to review all of the individuals and discuss them with Dr. Schwartz, I think it would be very advisable for me to come to Berlin with Drs. Paisley and Schwartz as well as yourself to discuss the cases from the environmental exposure standpoint, as well as the clinical findings. It would seem reasonable that this should be done before Dr. Paisley submits any written report.

If you have any questions or comments please let me know.

Jon L. Konsen, M.D.
