LEAD FEEDING STUDY

A draft of a report giving details of a 90-day rat feeding study involving lead paint chips is enclosed.

I thought you might be interested in seeing it now - it probably will be several weeks before it is released by the NPCA. We would like to get a paper based on this report published in a medical or pediatric journal. Do you have any suggestions as to how we might best accomplish this?

Please return this report.

E. E. SWAIN, JR.
