LEAD HYGIENE AND SAFETY BULLETIN
NO. 161

To Members of the Lead Industries Association, Inc.:

"INDUSTRIAL LEAD POISONING" BY DR. ROBERT A. KERR

This is the title of a chapter in Patty's book INDUSTRIAL HYGIENE AND TOXICOLOGY published in 1962. We have obtained a number of reprints of this chapter with the publisher's permission and are planning to use them as part of the material which will be sent out to the medical profession and others under our Lead Information Program. In my opinion it is the best single article on the subject and answers a good many of the questions which are commonly asked, and answers them in a clear and forthright manner.

In addition to the use of this material in our Lead Information Program we plan to send out copies of the article on request whenever a general question about lead hazard control in industry is asked us. If Patty's book is not available to you and you would like to have a copy of this article please let us know and we will be glad to mail one to you. We will also be glad to mail a copy to any of your customers or others who would like to have such information; just send us the name and address and we will do the rest.
