This memo verifies our conversation as to the handling of the two special samples requested by Mr. Kopp of the Federal EPA. Please call me promptly at Station 429 and verify that this is what is to be done and we will proceed with the actions.

1) We will take two one gallon grab samples at two places; one sample at the normal sampling spot for the Aroclor Department settling basin (south-west corner of Dept. 246) and the other of the Sauget Village Waste Treatment Plant Effluent.

2) Both samples will be analyzed for PCB by our laboratory. In addition, the effluent sample will be analyzed by the Sauget Village Treatment Plant Operator for the "usual" items; viz., COD, Phenol, Total Dissolved Solids, Suspended Solids, Settled Solids, pH and acidity ($CaCO_3$ equivalents).

3) After approval by Art Leisy for PCB and Mike Foresman for the "normalcy" of the other components, one gallon sample from each sampling point will be forwarded to:

Mr. Thomas Kopp
Office of Toxic Substances
Environmental Protection Agency
401 "M" Street
S.W.
Washington, D.C. 20406

Please call at your convenience.

P. E. Heisler
