Attached is a file of information received today from Mrs. G. Contos of Versar, Inc. The file includes the EPA Contract No., Work Authorization, Sub Tasks 1 and 2, a Procurement Request Rationale, and a Plant Waste Analysis bundle of 12 pages.

We have advised Versar that their visit can be scheduled during the week of Sept. 29. Since they have a completion deadline of Oct. 1, they will doubtless want to come on 9/29. We have suggested that they plan to cover the work they need to do at the Krummrich Plant, plus the information they have requested in their questionnaire in the same visit. Bill Papageorge is handling the questionnaire. Versar has indicated they will cover all problems in one visit.
