Eden Avenue
Cincinnati 19, Ohio

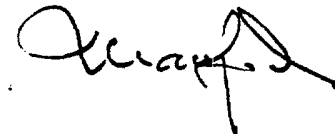

Dear Bob:

This is with reference to Dr. Atwater's letter to you of August 20th, of which, as you know, he kindly sent me a copy.

Since I last communicated with you and him on the subject of using "Occupational Lead Exposure and Lead Poisoning" in the Monograph on Lead which we are preparing for the A.C.S., the scene has changed somewhat and I now think that we will turn the lead hygiene job over to Schrenk and his associates at the Foundation. However, I am going to suggest to them that they plagiarize freely from the A.P.H.A. publication, for I feel that, despite its antiquity and obvious omissions, it is one of the most authoritative sources available on its subject.

So, as Dr. Atwater has expressed his willingness to let us so use the booklet, it would be a great help if you would take the time to answer his letter and give us the green light also. I am sure that you are even more buried under back correspondence than I, for you must have returned from your month of Waltonian endeavor just about as I came back from my two weeks of gazing at the Adirondacks and thanking God that I didn't have to climb them. Despite this, do please see what you can do for us.

Sincerely,

MB:GW

cc: Dr. Atwater
