John Mason is wiring today the favorable CMC reaction to our latest plan. Mason will give details of plan in his wire to you and Dahlstrom. We are suggesting that you develop the plan for Europe while you are there in basic accordance with this, particularly for the U.K. In the EEC and other European Continent countries, we will continue to supply and compete, but also continue to provide the leadership for other European producers.

Attached is our domestic timetable on what we are attempting to follow within the general agreement of the plan. You will note that this is more strict than what we have actually committed to the CMC, where in essence, we have until the end of the year to complete our reformulations and transfer of customers.

All in all, we are now encouraged that CMC will not put us out of business and they all agree that we are now taking responsible action.

I hope this reaches you in time for your Brussels meeting and that you are having a good trip.

Howard
