Re: Insulation 4 areas
El Paso Plant

Dear Sir:

After inspection at the above areas in the company of your Mr. Peters, we are pleased to quote as follows:

- A. 1. 3" blowdown from E 1909 A & B back to F.C.C. structure and to manifold southwest of D-1810.
2. 3" blowdown from E 1908 through manifold east of G-1904, then 4" to D-1919.
3. 2" blowdown from E-1611 to 2nd St. P/W, then 1½" to "B" P/W.
4. 2" Condensate from discharge G-1624 and A to 2nd St. P/W.
5. 3" & 4" Condensate from discharge G-1016 to "B" P/W.

This area, all 1" calcium silicate for straight pipe runs to be furnished by Standard Oil; all pre-cast ells and material for valves to be furnished by us. All covering materials - .020 mill finish aluminum on straight lengths banded at joints and mid-span, Asbeston fabric at ells and valves. The price for the above area-\$4,470.00.

If pre-cast ells are furnished by Standard Oil, deduct \$168.00.

- B. #6 Crude Unit and FCC Unit: We propose to furnish and install 1" calcium silicate at all straight runs and ells, covered with .020 mill finish aluminum, banded at joints and mid-span, Asbeston fabric at ells and valves.

The price for the above area - \$4,266.00.

- C. Patchwork at Platformer Feed System: We propose to furnish and install 1½" calcium silicate, except for 40 lin. ft. 1½"x8", and 8 1½" x 8" ells by Standard Oil, this to be covered with asbestos felt weather-seal stapled and banded to match existing. The price for the above - \$473.00.
