Newport NH 03773

Dear Mr. Wirkkala:

Thank you for your interest in Bird roofing products.

There is absolutely no asbestos in any of our rolled roofing products nor is there any asbestos in our roofing shingles. All our shingles are made with glass mat and those rolls marked Inorganic Felt are also made with glass mat. Bird certifies that these products are free of asbestos.

Enclosed, for your review, is our latest product catalog and a copy of our pro-rated shingle warranty.

Thank you.

Sincerely,

A handwritten signature in cursive script, reading "Cliff J Patenaude".

Dear Sirs

Would you please send me some information on your Roofing Products. I recently purchased some of your mineral surfaced Roll Roofing, Wood Blend Color. The roll said it is made out of asphalt Coated Inorganic Felt. I was wondering if this material contains any Asbestos or other hazardous material?

I also purchased some Jet 80 shingles. What is the difference between these shingles and the Mark 80 Jet shingles as to gaurantee life expectancy and also ~~do~~ these contain any asbestos or other hazardous material. Would you send me any information on your shingles and other roofing materials you make interlayment, flashing, Ice Belt, etc. as I have some more roofing to do very soon, I am interested in the Wood Blend Color. Does it hurt the shingles to install them in cold weather?

Thank you.

Sincerely, Richard Wirkkala
