To Paul Fetzer
From Tom Grumbles
Date January 27, 1981
Subject PRESENTATION AT 1981 INDUSTRIAL HYGIENE MEETING

As we have discussed, I would like for you to make a presentation on passive dosimetry. From the questions I have received, we need a lecture on the fundamental theory or concept of passive dosimetry, including limitations and comparison to other methods. Also I would like you to discuss your research work from the last two summers.

The day of your presentation will be Thursday, March 5. Further schedule information will be sent to you in the near future. Please call if you have questions at this time.
