December 4, 1944

Major Ludwig W. Eichna
Armored Medical Research Laboratory
Fort Knox, Kentucky

Dear Major Eichna:

We are glad to have your paper but wonder if we can have a first copy of the 15 charts, preferably on glossy paper, as they will make better cuts than the photostat reproductions you sent. We can make them from the material at hand but I assure you from experience that the others will be better and you will be better satisfied and so will we. We would appreciate your sending these new figures promptly.

The paper is splendid and we intend to put it in either the February or March issue. I hope you will offer this to Dr. Kehoe for presentation at the spring meeting of the American Industrial Hygiene Association and that you will write him now telling him of this possibility.

M. B.

Sincerely yours,

Philip Drinker
