

Every 1945 vegetable garden should produce snap beans, tomatoes, loose-leaf lettuce, Swiss chard, beets, carrots, cabbage, celery, Summer squash, eggplants, cucumbers, onions, radishes, and if there's enough room, corn, Winter squash and cantaloupes.

How much space you should devote to each vegetable depends upon family preferences, and total space

THE HOUR

SPEED-EASY WALL FINISH

- One gallon does average room
- One coat covers most surfaces
- White and colors **2.89** Gal.

New SELF-MIXING SPRAYERS

Simply Press A Button
and Your Hose Sprays
For You!

Just attach HAYES-ETTE to garden hose, turn on hydrant, lightly press a button and it sprays up, down or sideways. Capacity 1 1/2 gallons of mixed spray material. Efficiently does work of many larger sprayers.

you were scarcely expected. "Growing a supply of home use is not difficult, be very worthwhile considering the uncertainty of present supplies. Favorable yields harvested in the cool as well as in the warm.

"Since popcorn is a long season crop, it planted early, preferable for best yields. As with popcorn should be planted rather than one or two. Cross pollination will not affect the quality of popcorn. However, since of sweet corn is badly pollinated by popcorn planting dates should be after the sweet corn and popcorn flowering simultaneously.

"Variety Tom Thumb formed well in many trials, pop well, producing a white flake free of American, which yields

DELPHINIUM

Plant now for colorful Summer blooms. Sturdy field grown.

COLUMBINE

Long spurred hybrids. Dainty flowers for planting now. Field grown.
