THERMINOL® FR LO-TEMP FIRE RESISTANT HEAT TRANSFER FLUID

... the fire-resistant, low-temperature
liquid phase heat transfer fluid with
very low temperature pumpability.

TECHNICAL BULLETIN (T-LT)

THERMINOL® FR Lo-Temp
Vapor Pressure

Introducing Therminol® FR Lo-Temp

Therminol FR Lo-Temp is our newest fire-resistant heat transfer fluid formulated specifically for practical pumpability at -40°F .

This low-temperature fluid permits installation of a non-pressurized system operating with a liquid which has no fire point and will not support combustion.

The recommended operating range of Therminol FR Lo-Temp is -40°F to 400°F . It will not show measurable change after years of exposure at such temperatures.

The fluid is a chemically inert, noncorrosive compound with a pour point of -60°F and a vapor pressure of only 300 mm of mercury at 400°F .

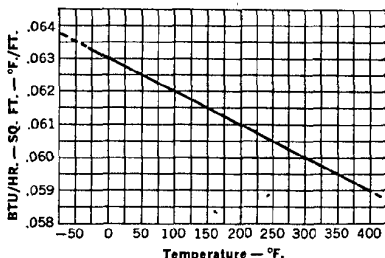

Listed as a fire resistant heat transfer media by Underwriters Laboratories, it can be installed for a wide range of uses in both space heating and cooling, gas processing and distribution, and industrial heating and cooling under conditions of low ambient temperatures.

TYPICAL PROPERTIES

Composition	Chlorinated biphenyls and hydrocarbons
Appearance	Oily, clear, nearly colorless liquid
Pour Point	-60°F .
Flash Point	280°F .
Flame Point	None to boiling
Autoignition Temperature	Over 1100°F .
Boiling Range	432°F . — 627°F .
