Specific In-Plant Safety Information

Tel: (205) 236-6381 **ANNISTON PLANT** **Mon Net: 621-0000**

REVISED: January 6, 1994

TRAVEL: To plant from Hartsfield Airport, Atlanta - exit to Camp Creek Prkwy, west 3.2 miles to I-285, north 7.4 miles to I-20, west 77.5 miles to Oxford/Anniston exit (Al-21/US-431, exit 185 Quintard), ¼ mi to 10th west on 10th St to Al-202 (Birmingham Hwy) to Monsanto. #185 Quintard to 202 1 on 202 to Monsanto
Hotel - Victorian at 1604 Quintard; Tel (205)-236-0503.

ENTRY PROCEDURES: All persons entering the plant property will initially sign-in at the main gate or office lobby. Upon first visit, contact the Safety Dept. (R.L.Freeman-472) for an orientation and discussion. In addition, you are required to sign-in/out in the control room of each production area visited.

PROTECTIVE CLOTHING/EQUIPMENT: Shirts with collars and sleeves that reach the wrist and long pants must be worn at all times. Wearing of ANSI approved safety shoes and hard hats (goggles attached) as well as industrial safety glasses is required in all production areas. Other personal protective equipment such as respiratory, hearing, and goggles must be worn before entrance into posted areas.

SPECIAL REQUIREMENTS: (Review General Plant Safety Rules)
Become knowledgeable of specific Operations Procedures or Department Safety Rules in work area. Information about the physical and health hazards and protective measures for all chemicals you could be exposed to can be found in MSDS manuals in each work area. Wearing of contact lenses, rings or other jewelry is prohibited in production and maintenance areas. Matches and lighters are prohibited inside the plant fence.

EMERGENCY ALARM SYSTEM: Report any emergency to the control room or directly by dialing on any phone, 777-XXX, The X is either 1,2,3 or 4 to indicate the alarm zone, (Example, Zone 2 is: 777-222). Then dial 216 or 226 and report nature of emergency. The alarm zones, divided by the railroad spur and 5th street, are noted in the Guidelines for Contractor Safety and Conduct (obtain copy during initial orientation). Notification of an emergency within the plant will be by sounding of short horn blasts.

AFTER-HOURS EMERGENCY CALL LIST:

Lamar Freeman,	Safety Supervisor,	(205)-435-2660
Conrad Gamble,	Tech & Engrg Supt,	(205)-237-7197
Jerry Brown,	Mfg. Technologist,	(205)-748-3848

REMARKS: Access to the hydrogen compressor area in the Polyphenyl

DSM 133903

Unit is restricted.
