Reference Your letters of September 20, 1957, to Dr. Treon and Dr. Hays

Subject DR. SENDROY, NAMRI

I am looking forward to your visit October first and second and have made arrangements to see Dr. Sendroy on Tuesday afternoon, October first, and Dr. Harry W. Hays, National Research Council, on Wednesday morning, October second.

October second is going to be awfully crowded as Warren Easley and others from the Everett Special Projects Research Group will be in town for classified visits on the second, third, and fourth. We are to be at Fort Belvoir at 10 a.m. on October second. Do you feel that a meeting with Dr. Hays between 8:30 and 9 o'clock in the morning would be adequate as I must leave for Belvoir by 9:30? We might also arrange to see Dr. Hays later in the afternoon of the first if you feel this would be more desirable.
