A I have a bachelor of industrial engineering degree from Rensselaer Polytechnic, I have a bachelor of mechanical engineering degree from Rensselaer Polytechnic and I have a master's, an MBA in accounting from Siena College and that's it.

Q What year did you get your MBA?

A 1964.

Q What years did you work for Bendix?

A From 1948 until I believe it was 1965.

Q What were your positions there?

A I was a test engineer and then I became chief engineer of cerametallics.

Q What is that?

A Ceramic and metallic friction materials.

Q Could you briefly tell me your job responsibilities in that position?

A You worked on product development and you worked with the factory to make sure the product coming out of the factory was the one that you told them to make.

Q During any period while you were at Bendix, did you work on developing an asbestos-free friction product?

A That's a very all-encompassing question. At that time there was no feeling that there was any problem with
