Mr. Elmer P. Wheeler
Industrial Hygienist
Monsanto Chemical Co.
1700 S. Second Street
St. Louis 8, Missouri

Dear Elmer:

Thanks for your letter of October 9.

In relation to Pydraul P-150 I had to take Ralph off for a while for several reasons. Just after he was able to return to it he was sick for a week. Put now he has got his equipment all fabricated and set up. He is running a blank on the room air today and should be rolling good within the next few days.

In relation to the TAP report on animal work the first draft is in the possession of the pathology department.

In relation to the TAP project on human subjects, we are in the latter part of the 5th week. Despite certain handicaps we have maintained our intended schedule. Certainly from inspection of the data to date I get the impression the Cellulube 220 may be having a little more effect than OS-70, however, I doubt this is very significant.

Sincerely yours,

Joseph W. Treon
