

IHF Number 25, January of 1950, Asbestosis, Analysis of 40 Necropsied Cases, by Dr. Lynch in Chest magazine in 1948.

IHF Number 27, March of 1950, Pulmonary Asbestosis: A Study of a Case, an Italian article, anatomicopathologic study.

Mr. Smith egged me on to read that, Your Honor.

IHF Number 28, September of 1950, Asbestosis, in the Postgraduate Medical Journal in December of '49.

This time this document IHF-33 is against -- offered against Owens-Illinois and Ford. February of 1952. Experimental Asbestosis in Rats. Also a study with an electron microscope concerning particles of asbestos found in the air.

Again, against the two, O-I and Ford, IHF Number 34, April of '52, Experimental Asbestosis, a German article in 1951.

MR. SMITH: These were translated into English.
