Kimberly

Unfortunately, I will not be able to participate but thank you for the invitation.

All the best,

Steve

Subject: [EXTERNAL] Invitation: Keynote Speaker & Ribbon Cutting - Natural Gas Industry's Premier Event for Technological Innovations (May 6, Aurora, CO)

Under Secretary Winberg,

On behalf of the American Gas Association (AGA), you are cordially invited to be the keynote speaker at our **nation's premier event for natural gas utility and transmission technological innovations**. The *2025 AGA Operations Conference & Biennial Exhibition* will bring together thousands of operations professionals from across the continent to exchange ideas that **strengthen the reliability of our energy system, reinforce our energy dominance, and bolster our country's economic advancement**.

The 2025 AGA Operations Conference & Biennial Exhibition is May 6th-8th at the Gaylord Rockies in Aurora, CO. You are invited to participate in the commencement events, including providing brief remarks at the Opening General Session and assisting with the Exhibition Ribbon Cutting Ceremony, which will take place late afternoon on May 6th. The highlight of your experience will be visiting the **world class showcase displaying nearly two football fields of innovative technologies and services** that drive operational excellence and continuous improvement for natural gas system construction, operation, and maintenance. Exhibiting companies range from Fortune 100 technological leaders... to "Main Street, USA" family-run businesses... to entrepreneurs trying to break into the natural gas market. **Gain critical insight directly** from the companies that are bringing the latest technologies to the field and from the operators applying those technologies. **Experience firsthand time-tested and new technologies** that support the safe, reliable, and cost-effective delivery of natural gas to more than 189 million Americans and 5.8 million businesses. The Conference portion of the event takes place on May 7th-8th and features over 120 technical presentations that run the gamut of topics, including gas measurement, operations safety, storage, engineering, construction and maintenance, gas control, supplemental gas, environment, corrosion control, and pipe materials.

This invitation is also extended to your staff in the Office of Cybersecurity, Energy Security, and Emergency Response; Office of Fossil Energy and Carbon Management; and Office of Electricity – all with whom AGA works closely and may find the Exhibition a valuable learning opportunity.

Thank you in advance for your consideration. Should you have any questions, please do not hesitate to contact me at kdenbow@aga.org or on my mobile at (b) (6).
