AUDICOTE

a new acoustical plaster

For spray or trowel application

AUDICOTE is a highly versatile acoustical plaster with exceptional bonding ability. Designed for use over gypsum basecoat plaster or other firm, clean surfaces. Only the addition of water is required to produce a smooth-working plaster ideal for either machine or hand application.

N.R.C.† up to .60

AUDICOTE dries to form a porous, sound-deadening surface which may be hand-finished or left with an attractive machine-applied texture. Basically mineral, it will not support combustion. Satin White AUDICOTE gives light reflectance of .58, and may be spray-painted without material loss of sound absorption.

See your U.S.G. dealer, or write Dept. PI-4, 300 W. Adams Street, Chicago 6, Illinois.

† Noise Reduction Coefficient *T.M. Reg. U.S. Pat. Off.

COMING YOUR WAY! NEW U.S.G. "PLASTER CAVALCADE"! Big mobile theater, bringing you informative demonstrations of modern time-saving and labor-saving lathing and plastering systems. Ask your U.S.G. Dealer or Salesman for details.
