

CHAPTER VII

OCCUPATIONAL AND ACCIDENTAL TUMORS OF THE MESENCHYMATOUS TISSUES	637
1. Anatomical and Functional Considerations	637
2. Fibrillar Connective Tissue	638
<i>A.</i> Chemical Agents	638
<i>B.</i> Physical Agents	639
<i>a.</i> Radiating Energy	639
<i>i.</i> Ultraviolet Rays	639
<i>ii.</i> Roentgen-Rays	640
Occupational and Therapeutic Roentgen-Sarcomas	640
Experimental Roentgen-Sarcomas	641
<i>iii.</i> Radioactive Substances	642
Therapeutic Radium-Sarcomas	642
Experimental Radium-Sarcomas	643
<i>iv.</i> Physical Trauma	644
Benign Tumors: Fibroma; Keloid; Dupuytren's Contracture	644
Malignant Tumors: Sarcomas	648
3. Muscular Tissues	650
<i>A.</i> Leiomyomatous Tumors	650
<i>B.</i> Rhabdomyomatous Tumors	650
<i>C.</i> Myositis Ossificans	651
<i>D.</i> Desmoid Tumors	652
<i>E.</i> Experimental Tumors of Muscle Tissue	652
4. Vascular Tissue	653
<i>A.</i> Telangiectases and Varicosities	653
<i>B.</i> Traumatic Hemangiomas	654
<i>C.</i> Angiomyoneuromas (Glomus Tumors)	655
5. Adipose Tissue	656
<i>A.</i> General Anatomical Considerations and Classification	656
<i>B.</i> Experimental Lipomas	657
<i>C.</i> Traumatic Lipomas	657
<i>a.</i> Solitary Lipomas	658
<i>b.</i> Multiple Symmetrical Lipomatosis	660
<i>c.</i> Lipophagic Granulomas	661
<i>d.</i> Xantheloids	663
6. Joint Capsules and Tendon Sheaths	665
<i>A.</i> Ganglions	665
<i>B.</i> Intraarticular, Synovial "Osteochondromas"	666
<i>C.</i> Xanthogranulomas	666
<i>D.</i> Synoviomas	667
7. Osseous and Cartilagenous Tissues	667
