Matt,

On background: Yes, the statement remains accurate.

Subject: WebMD request for updated info about air duct cleaning

Hi Mark, I'm writing an article about air duct cleaning for WebMD, and I have a quick question for you. I'll be drawing on this article on EPA's website: <https://www.epa.gov/indoor-air-quality-iaq/should-you-have-air-ducts-your-home-cleaned>. Can you let me know if it's up to date? I'm particularly interested in confirming that this statement remains accurate:

"Duct cleaning has never been shown to actually prevent health problems. Neither do studies conclusively demonstrate that particle (e.g., dust) levels in homes increase because of dirty air ducts."

Thank you!

Matt McMillen
