

Modern..

For sixty years the United States Cartridge Company has been constantly at work on the invention and development of better ammunition, utilizing the newest powders, the latest loads, and the most modern methods of manufacture, with the object of producing perfect cartridges and shot-shells. As a result the U. S. Cartridge Company is directly responsible for many improvements and innovations in the ammunition field. The latest product is a higher velocity cartridge for the new .38 Colt Super Police Pistol.

Yes, U. S. Cartridges are modern—from the super-accurate .22 N. R. A.'s and the coppered .22's to the hardest hitting Self-Cleaning hunting cartridges—and because of this they are the choice of sportsmen *who know*.
