Subject: PFOS items

Following up on my phone call with Bill Weppner on May 15, I want to confirm a few points:

3M has arranged a discussion with the Commission of the EU on May 24 in Brussels to discuss PFOS. I am included in the meeting participants. 3M will forward copy of communications establishing the meeting to facilitate preparation of my travel papers.

The next package of 3M information on PFOS will come in this Thursday (May 18). This will include information on testing of PFOS mixtures.

Information on PFOA and other PFOS derivatives will be submitted by 3M next week. Information on other mixtures will be submitted by 3M by June 9, 2000.

3M will provide descriptive information on the Chemstar Panel on perfluoro chemistry such that EPA can request a meeting with the Panel.
