CABINET VENTILATOR

At left, Model 5501 for kitchen cabinets, shown with optional Stationary Hood.

SUPER CLIPPER MODEL 3501. 550 cfm kitchen ventilator installs in cabinet directly over stove. The dual inlets, one directly over the stove, the other at ceiling level are equipped with cleansable metal filters. The unit has twin blowers, isolated and radio shielded 140 watt motor, 4-speed switch control and built-in back draft damper. Four optional hood styles are available in copper or stainless steel and in standard lengths from 30 in. to 48 in.

CEILING VENTILATORS

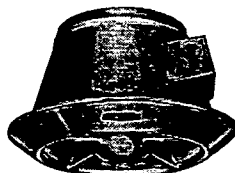

Trade-Wind ceiling ventilators are designed for small rooms such as kitchen, laundry, den, ticket booths, offices and photographic darkrooms. They come in complete "unit package" assembly, requiring only the application of a discharge duct for installation. Units are Underwriters' approved and listed and carry a (pro-rata) five year guarantee.

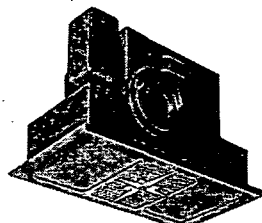

CLIPPER MODEL 2501. Shown above. 425 cfm for 2000 cu ft room. Dual centrifugal blowers. 130 watt motor. Interchangeable horizontal or vertical discharge, complete with grille and 4-speed switch. Filter kit available.

CLIPPER MODEL 1501. 300 cfm for 1000 cu ft room. Dual centrifugal blowers. 105 watt motor. Interchangeable horizontal or vertical discharge, complete with grille. Filter kit available.

CLIPPER MODEL 1201. 100 cfm for bathrooms only. 50 watt motor. Horizontal discharge, complete with grille. Optional time delay switch available.

AXIAL FLOW MODEL AF-7M. Compact 300 cfm axial flow ventilator for ceiling or wall in 1,000 cu ft room. It can be installed between joists in ceiling or between studs in the side wall. No elbows are required for vertical discharge. 50 watt motor. Available with aluminum or ivory grille.

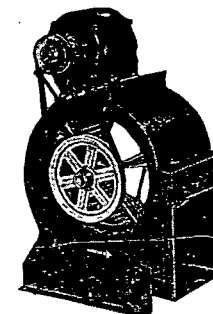

VENTILATOR/LIGHT MODEL 1701. 100 cfm for bathrooms. 50 watt motor, horizontal discharge. Features modern Alba-lite glass grille, with two light sockets. Unit is prewired to external switch box. May be connected to single or double switch. Optional time delay switch available.

Viking Blowers Solve These Design Problems...

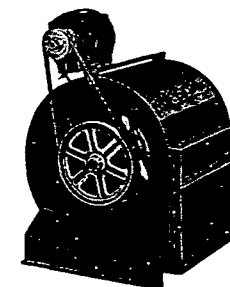

Viking "U" Blower
(with end-supported wheel)
9 in., 11 in., 13 in.
Full and 3/4 widths

Illustrations of 12 Possible
Arrangements of a Single
Viking Assembly with
Lock-on Feet

... Cost Reduction—the Lock-on Feet and multiple motor positions of the Viking Universal Blower Assembly reduce inventory, eliminate dead blower stock, cut lead-time needed in ordering and reduce initial cost. Parts designed to permit quick assembly.

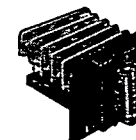

... Interchangeable Parts—many of the important features of Viking Blower Assemblies available in these component parts: New Mark III Bearing is factory-packed but designed to permit the addition of oil; New Quadruped Bracket eliminates noise possibilities and strengthens blower housing; New Center-Disc Non-Flexing "B" Wheel is engineered for strength; and Universal Lock-on Feet designed to require a minimum of assembly time.

Viking "B"
(with center-plate wheel) 9 in., 10 in.,
12 in. Full and
3/4 widths

... Interchangeable Blowers—in performance, dimensions, belts, pulleys and air patterns. Viking's "B" Blowers meet A.G.A. requirements as acceptable substitutes for competitive "A" Series Blowers and can be substituted immediately without A.G.A. retesting and without design or specification changes by manufacturers. Also has Universal Blower quick-assembly features.

5600 Leak-Proof
Humidifier...

New ovenware glass pan eliminates leaks, corrosion and rust common in old-fashioned humidifiers. Completely automatic unit.

Viking® Air Products, 5601 Walworth Ave., Cleveland 2, Ohio

... Space Restrictions—New Viking Drive Blowers, both side-supported and integral-drive types, are available where space is at a premium. For more air and control test the new Viking Moto-Blower (integral-drive type).
