STEEL INDUSTRY SEEKS WORKERS

CHICAGO—(AP)—The steel industry, based for its largest year in history, is running out of workers in the Chicago area and has begun to recruit workers in its own area.

Two of the industry's plants, U.S. Steel and Inland Steel, reported today they are carrying recruiting drives for their busy Chicago area plants into the far corners of the Midwest and Pennsylvania in an effort to keep up overworked crews.

The problem, say industry spokesmen, is the lack of skilled labor in Chicago, traditionally a fertile source for the steel plants. "We've advertised here and tried to make with employment agencies," said a Chicago spokesman for U.S. Steel, "but we are just unable to meet our requirements."

U.S. Steel spokesman said U.S. Steel will continue to recruit in the area, but it may be necessary to recruit in other areas.

The spokesman said U.S. Steel will continue to recruit in the area, but it may be necessary to recruit in other areas.

ASBESTOS LINKED TO LUNG CANCER

BY ALTON BLAKESLEE
Associated Press Staff Writer
NEW YORK—Medical specialists pointed a strong finger of suspicion today at asbestos as a cause not only of lung cancer, but also of another extremely rare form of fatal human cancer.

This cancer, known as mesothelioma, involves the lining of the abdominal and chest cavities.

North of their source comes from asbestos, a mineral, says the American Cancer Society.

They, hard particles of asbestos can lodge in the lungs during mining, processing and application of asbestos-containing materials.

But they said it is possible that dust from products containing asbestos may be a cause of cancer.

Release Day
Asbestos is not only a cause of lung cancer, but also of another extremely rare form of fatal human cancer.

The report was presented at a meeting of the American Cancer Society.

Better Hearing

By E. L. STONE, Director
Larkin Hearing Aid Center
1111 Main Street, Bridgeport, Conn.

Member Tells Us Of
Son's Hearing Progress

One of the most rewarding experiences I have had in my life is the progress my son has made in his hearing.

My son, John, was born with a hearing impairment. He was unable to hear sounds that most children can hear.

When he was three years old, he was brought to the Larkin Hearing Aid Center for a hearing examination.

The examination showed that John had a moderate hearing impairment. He was unable to hear sounds that most children can hear.

At the time of the examination, John was three years old. He was unable to hear sounds that most children can hear.

After the examination, John was fitted with a hearing aid. He was able to hear sounds that most children can hear.

John's progress has been remarkable. He is now able to hear sounds that most children can hear.

John's progress has been remarkable. He is now able to hear sounds that most children can hear.

John's progress has been remarkable. He is now able to hear sounds that most children can hear.
