

Cooling towers (continued)

- hyperbolic, 746
 - installation, 754
 - mechanical draft, 745
 - operation, 754
 - cold weather, 755
 - enclosures, 755
 - noise, 754
 - two-speed motors, 755
 - performance curves, 752
 - selection, 754
 - spray ponds, 743
 - theory, 747
 - crossflow integration, 749
 - counterflow integration, 748
 - water treatment, 755
 - wood deterioration, 756
- Corn, shelled, 133**
- mechanical drying, 133
 - storage, 134
- Corrosion**
- biological growths, 237
 - concentration cell, 224
 - dissimilar metal, 224
 - erosion, 226
 - fire, 241
 - galvanic, 225
 - high temperature, 241
 - intensifying factors, 224
 - preventive measures, 226
 - cathodic protection, 228
 - environmental change, 230
 - materials selection, 226
 - protective coatings, 226
 - refrigerant side, 241, 765, 775, 783
 - stress, 225
 - terminology, 223
 - theory, 223
 - underground, 239
 - waterside, 230
 - heating and cooling systems, 232
 - Langlier saturation index, 235, 236
 - water characteristics, 231
 - water treatment, 233
- Cotton, 134**
- drying, 134
 - ginning, 134
 - moisture content, 134

Cryogenic fluids

- tables and charts, 293, 353-370

D

- Dampers, 175, 555-558
- D'Ary equation, 88
- Definitions, 951

- Defrosting, 895, 901
- commercial refrigerators, 898
- household refrigerators, 902
- Degree of saturation, 30

- Dehumidification, 262, 593, 603
- absorbents, 262, 264, 266
- adsorbents, 266
- air washers, 593
- at elevated pressures, 267
- costs, 603-612

- Dehumidifiers, 262, 933
- codes and standards, 934
- summary, 934
- design features, 933
- performance, 933
- sizes, 933
- sorption, 262

- Dehydration, 757
- methods (factory), 757

Dehydration (continued)

- dry air, 757
- dry nitrogen, 757
- heat, 757
- heat and dry air, 758
- heat and vacuum, 758
- special considerations, 759
- vacuum, 757
- moisture measurement, 758

Density, 977

- gases, 977
- liquids, 978
- vapors, 977

Desiccants, 264, 778

- adsorption, 779
- chemical reactions, 779
- acids, 780
- chemicals, 780
- colloids, 780
- colors, 780
- oil deterioration products, 780
- equilibrium conditions, 778
- rehydration, 778
- solid core, 778
- testing, 781

Design conditions, 469, 487

- summer
- indoor, 487, 494
- outdoor, 488-495
- winter
- indoor, 477
- outdoor, 469-477

Dev-point

- conversion chart, 263
- temperature, 29

Diffusers, 553

- ceiling, 556
- accessory devices, 556
- applications, 557
- special features, 558
- slot, 555
- accessory devices, 556
- applications, 555
- special features, 556

Diffusion, diffusivity, 75

- coefficient, 76
- convective (eddy), 79
- mass, 77
- molecular, 76
- momentum, 77
- thermal, 77

Draft, 835

- available, 835, 840, 841, 843, 844
- industrial chimneys, 840
- natural, 835, 840
- required, 835
- requirements of appliances, 844

Driers, 775

- refrigerant, 780
- rating, 781
- selection, 781
- testing, 781

Dry-bulb temperature, 29**Drying**

- farm crops, 127
- moisture measurement, 759
- refrigerant systems, 757, 775
- desiccants, 777
- driers, 783
- methods, 757, 776

- Duct, ducts, 192, 202, 561
- attenuation, 192, 202

Duct, ducts (continued)

- lined ducts, 208
- lined plenum, 208
- untreated ducts, 204
- circular equivalents, 565-567
- construction, 576-580
- rectangular high-pressure, 579
- rectangular low-pressure, 576
- rectangular medium-pressure, 578
- round, 577
- design, 561, 570
- equal-friction method, 571
- high velocity, 575
- procedure, 570
- static-regain method, 572
- velocities, 570
- velocity-reduction method, 571
- dynamic losses, 565
- friction losses, 562-565
- heat losses, 579
- noise generation, 205
- pressure changes, 561
- pressure losses, 567
- area changes, 569
- divided-flow fittings, 568
- elbows, 567
- weights, 580

Duct sizing, 571

- equal-friction method, 571
- static-regain method, 572
- velocity-reduction method, 571

Dust, 147

- combustible, 151, 157
- concentration, 153
- particle size chart, 148

E**Eddy formation, 90****Effective temperature, 107**

- chart, 107
- index, 107

Ejectors, 556

- air, 557
- steam-jet, 556, 558
- emissivity, 52, 979
- solids, 979, 980
- surface, 52

Enthalpy

- conversion factor, 986
- counterflow integration, 748
- definition, 955
- entropy diagram
- steam ejector, 558

- lithium bromide concentration diagram, 16
- moist air, 31-34
- potential, 82

- pressure diagram
- basic vapor compression cycle, 4
- complete refrigeration cycle, 714
- simple compression refrigeration cycle, 647

- water, 662
- refrigerants, 293-370
- saturated steam, 39-40
- symbols, 967
- temperature diagram

- air-cooled condenser, 692
- counterflow cooling, 747, 749, 750, 751
- water, 35-38

Entropy

- conversion factors, 986
- definition, 955

Index to Technical Section

Entropy (continued)

- enthalpy diagram
- steam ejector, 558
- moist air, 31-34
- refrigerants, 293-370
- saturated steam, 39-40
- symbols, 967
- temperature diagrams
- basic vapor compression cycle, 5, 7, 8
- dual-compression, dual-expansion cycle, 10
- reversed Carnot cycle, 5-7
- water, 35-38

Environmental control, 101, 117

- attitude, 117
- human body, 101
- plants, 122
- poultry, 121
- sheep, 119
- swine, 120

Equations of state, 2**Ethylene glycol, 375**

- boiling point, 376
- condensation temperature, 376
- freezing point, 375
- inhibition, 378
- physical properties, 375
- service considerations, 378
- specific gravity, 377
- specific heat, 378
- thermal conductivity, 378
- viscosity, 377
- Eutectic solution, 371, 375
- diagram, 371

Evaporative air cooling, 593

- air washers, 593
- equipment, 598
- principles, 593
- rotary unit, 599
- sling unit, 598
- wetted-pad unit, 598
- Evaporative condensers, 697

Evaporators, air cooling, 603

- direct-expansion, 603
- applications, 606
- arrangement, 603
- construction, 603
- control, 605
- dehumidifying, 608, 611
- dry, 608, 610
- heat transfer, 609
- performance, 610, 611
- resistance, 609
- selection, 607

Evaporators, liquid cooling, 703

- design criteria, 705
- chemical requirements, 706
- mechanical requirements, 706
- performance requirements, 706
- friction loss, 706
- refrigerant pressure drop, 707
- heat transfer, 60, 707
- analysis of test results, 708
- chilled liquid film coefficient, 708
- fouling factors, 709
- overall rates, 709
- refrigerant film coefficient, 707
- Wilson plot, 708
- types, 703
- Baudelot, 704
- centrifugal system, 705
- double-pipe, 704
- dry expansion, 704
- flooded shell-and-tube, 703

Evaporators, liquid cooling (continued)

- flooded tank-and-agitator, 705
- shell-and-coil, 705
- spray, 703

Expansion valves, 715

- constant pressure, 722
- application, 722
- operation, 722
- selection, 722
- superheat, 718
- factory setting, 718
- gradient, 718
- operating, 718
- static, 718
- thermostatic, 717-722
- application, 720
- capacity, 718
- charge, 719
- desuperheating, 722
- flooded system, 721
- operation, 717

F**Fallout, 158****Fan, fans, 583**

- applications, 591
- arrangements, 587, 588
- control, 587
- installation, 590
- laws, 584
- location, 589
- motors, 589
- noise, 592
- outlet velocity, 590
- performance, 583, 585
- system characteristics, 587
- types, 583

Farm crops, 127

- drying specific crops, 132
- corn, 133
- cotton, 134
- grain, 133
- hay, 132
- peanuts, 135
- rice, 135
- drying theory, 129
- moisture measurement, 128
- physiological factors in drying and storing, 127
- grain condition, 128
- moisture content, 127
- oxygen supply, 127
- temperature, 127
- storage, 127
- maximum moisture content, 128
- oxygen supply, 127
- temperature, 127

Fick's Law, 76**Figure of Merit, 23****Filters, 617**

- applications, 625
- installation, 624
- maintenance, 624
- performance, 622
- rating, 617
- limitations of, 619
- significance of, 619
- test methods, 617
- selection, 624
- supply air, 617
- types, 620
- dry, 621
- electronic, 622
- viscous impingement, 620

xv

- Finned-tube units, 857, 859
- applications, 861
- effect of water velocity, 861
- heat emission, 857
- non-standard conditions, 860
- ratings, 860

Fittings, pipe, 882

- applications, 882, 893
- braced joints, 885
- dimensions, 883-889
- flange facings, 886
- flared compression, 886
- gaskets, 886
- pressures, 883
- screws, 882
- solder data, 883
- soldered joints, 884
- specifications, 883
- sweat joints, 883
- valves, 887

Float valves, 725

- high-side, 725
- application, 726
- operation, 725
- selection, 725
- low-side, 726
- application, 726
- selection, 726

Fluid, fluids

- flow, 87
- compressible, frictionless, 88
- incompressible, frictionless, 88
- real fluids, 89
- two-phase, 91
- fundamentals, 87
- physical properties, 98
- pressure losses, 95
- theory, 88
- types, 88
- Fog, 149

Freezers, home, 901

- calendars, 908
- condensing units, 909
- evaporators, 909
- rating, 910
- refrigerating systems, 909
- refrigeration failure, 910
- temperatures, 910
- freezing, 910
- storage, 910
- testing (ASA standards), 910
- Friction factor, 80, 91

Friction losses, 561

- divided flow fittings, 568
- duct elbows, 567
- ducts, 562-565
- due to area changes, 568, 569

Fuel-burning equipment, automatic, 805

- controls, 815
- gas-burners, 810
- commercial, 812
- domestic, 810
- industrial, 812
- mechanical stokers, 805
- oil-burners, 806
- commercial, 808
- domestic, 806
- industrial, 808

Fuels, 269, 805

- gas, 273
- classification, 273
- oil, 271
- atomizing, 806-809
