

Your Management wants to know...

How to end the fly ash nuisance

PLANT ENGINEERS, working with Buell engineers, have proven again and again that their know-how coupled with Buell's long experience in Dust Collection can solve your Fly Ash problems more economically, more efficiently.

What's more, Buell Dust Collection Systems offer all American industry these further advantages: smoother plant-community relations, improved product quality and better employee morale.

Buell's knowledge and experience in the highly specialized science of Dust Collection are yours. To learn more about Buell's 3 basic systems of Dust Collection and how they can help you, send for the new, informative booklet titled, "The Collection and Recovery of Industrial Dusts." Buell Engineering Company, Dept. 30-E, 70 Pine Street, New York 5, New York.

ENGINEERED EFFICIENCY IN DUST COLLECTION

Electric Steam Generator
514 • Electrically operated steam generators employ electrodes instead of resistance heating elements. Designed for 250 or 550 v, they operate most efficiently at the two higher voltages. Features claimed by manufacturer are: 98% efficiency, unity power factor, no tubes to scale, no blowdown, no water treatment required, one half to one third floor space of equivalent fuel fired units. Available to 600 and pressures to 600 psi.
Livingstone Engrs Co, 100 Grove Street, Worcester 5, Mass.

Turbocharged Diesels
531 • Five engine sizes, from 425 to 1000 cu in. displacement, now incorporate turbocharging. Manufacturer claims substantial power increases and greater fuel economy. Units use any standard diesel fuel.
All engines are heavy-duty, 4-cylinder, 4-cycle units. Power rating of the 425 cu in. engine is increased from 147 to 185 hp. The 2894 cu in. engine rating is increased from 406 to 570 hp.

Fittings on the hydraulic system of the famous Universal Coal Cutter, manufactured by The Jeffrey Mfg. Co., Columbus, Ohio, are PARKER trouble-free Triple-Lok.

coal cutters

Tube it up...Forget it...WITH PARKER

TROUBLE-FREE TRIPLE-LOK FITTINGS

Coal cutters get rougher use than coal cutters in other machines. Subjected to severe vibration, caused by the action of the cutting head, and operating under the most adverse conditions, all parts must be heavily built, including the hydraulic system. Find Parker Triple-Lok Fittings on coal cutters and many other machines used in rough, hard service because they are leakproof under the most severe conditions of vibration, elevated tem-

peratures, high pressures and repeated assembly. Parker Fittings meet the specifications of the A.S.M.E. Code for Pressure Piping, as well as J.I.C. and S.A.E. standards.

So tube it up and forget it... with Parker Triple-Lok Fittings. Ask your Parker Distributor for Tube Fitting Catalog 4300, or write The PARKER Appliance Company, 17325 Euclid Avenue, Cleveland 12, Ohio.

This does it

Triple-Lok... 3-piece flare fitting famous for its sleeve... the easiest way to install tubing systems. Made in brass, steel, stainless steel, aluminum alloy.
