From Tom Grumbles
Date January 18, 1983
Subject AMWAY 1412-60 SPILL

At the request of Angela Birch, Supply and Transportation, I called Mark Hoogewind (616/676-6876) at Amway, concerning a spill of 1412-60 ALFONIC. He did not have many details, but told me an undetermined amount has been spilled from a railcar during a minor derailement. He did not know the amount, condition of the car or state of the spilled product. Temperature at the site was 20°F.

I discussed with him the potential health effects and disposal procedures as outlined on our MSDS for the product. He was told to contact me if he had further need for information.
