

MAREMONT PRODUCT ENGINEERING DEPARTMENT ENGINEERING BULLETIN		Bulletin No. 53-001
Product: Relined Brake Shoes		Supplement No.
Subject: Consolidation of Brake Shoe Cores With Tabs on Shoe Table		Date 9-12-67
Reference:		Page 1 of
		Superseding No.

The brake shoes being supplied on all late 1967 and certain 1966 Chrysler applications are equipped with three tabs on the edges of the shoe table. The tabs are formed by bending over projections of the shoe table. Their purpose is to provide larger contact area with the backing plate. Although providing an improved friction in the system these shoes are completely interchangeable with earlier numbers. Use of earlier numbers in these applications will show no discernible change in performance. For this reason these cores may be consolidated with earlier cores as shown below.

F.M.S. #274	Consolidate with F.M.S.	#148
#275		#174
#286		#114
#238		#256
#290		#155
#291		#253
#293		#254
#294		#148
#304		#112
#306		#255
#309		#174

The attached identification sheets are for assistance in identifying these cores not shown in the 1966 F.M.S.I. Core Book.

NOTE: It must again be emphasized that mixed cores are not acceptable to the customer. Please, DO NOT MIX THESE CORES.
