Subject: Allowable C-8 levels in employee drinking waters

Gerry, Tony and I need to have a one hour phone discussion with you concerning allowable levels of C-8 in the drinking water for site employess. This issue came up in the meeting held on 5/27 dealing with Washington Works C-8 groundwater issues. Leigh Belcher sat in for you.

There are a few tricky issues due to recent C-8 data and the drinking water wells of our adjacent GE plant.

We would like to discuss this subject with you and how best to deal with this issue.

Please indicate a time over the next two weeks when you could be free. Tony please do the same.

At this time I am ok all days except Friday June 18.

Roger.
