REVISED

Subject: VCM DOSIMETRY DATA

Interoffice
Communication

VISTA

Attached is a summary of VCM dosimetry data for fiscal 85, 86 and 87. As you can see, there has been significant improvement in the number of VCM overexposures and in the number of overexposures without a respirator. In fact, overexposures for the plant as a whole are down 56.4% since FY1985.

If you have any questions on this, please call me.

Keith L. Fogg
Safety Director
