

EMISSIONS SUMMARY for the ENTIRE FACILITY**SECTION C**

List below the total emissions for each pollutant from the entire facility in accordance with Operating Permit Application Requirements, pp. 3-5. For stack emissions, use the maximum annual allowable (potential) emissions. For fugitive emissions, use the annual emissions calculated using the maximum operating conditions.

POLLUTANT Footnote 1	ANNUAL EMISSION RATE	
	lb/hr	tons/yr
PM		198.69
PM ₁₀		185.64
NO _x		198.71
SO ₂		4.49
CO		146.93
VOC*		50.83
Vinyl Chloride		138.6
Lead		0.56
HAPs **		

1. All regulated air pollutants, including hazardous air pollutants emitted from the entire facility should be listed. A list of regulated air pollutants has been provided in Section A.

* All Hazardous Air Pollutants (HAPS), except heavy metals, are included as VOCs for reflection of total VOC emissions for the facility. They are identified separately for each emission point source.

** Potential HAPs are as follows: Lead, Arsenic, and Cadmium compounds, HCl, Chlorine, Phthalic Anhydride, Isomers of Hexane, Formaldehyde, Toluene, Benzene

With the exception of the emissions resulting from insignificant activities and emissions as defined in Regulation APC-S-6, Section VII, the pollutants listed above are all regulated air pollutants reasonably expected to be emitted from the facility.
