FILE ① Competitive mail
② New Contracts

August 22, 1978

TO: Mr. S. S. Conway, Jr.

FROM: Donald G. Manly

Attached information indicates a new competition for us in 551C and D.

The test of Merkel's which Steis refers to was one test of a glass fiber, no asbestos, mid friction block on a Rockwell brake. It looked very good. Additional blocks will be available for test by the end of this week.

I elected not to discuss these results at the Process Meeting since it was only one test.
