# CATALOG DATA SECTION

## CONTENTS

### AIR CONDITIONING—Pages 883-937

Equipment for complete air conditioning systems—apparatus for air circulation, air cleaning and heat transfer, with control apparatus for maintaining temperature and humidity. Systems for all-year, winter, and summer service, and special processing work.

Central Systems: Assembly of supply and return ducts serving one or more spaces, connected with some or all of the following equipment: fans, motors, heat transfer surfaces, humidifiers, dehumidifiers, refrigeration machinery, air cleaning devices and control equipment. Design procedure is given in Chapter 21 of the Technical Data Section.

Direct Fired Units: Automatic heating and comfort air conditioning apparatus; oil, gas or coal heating units. Technical data in Chapters 12, 19 and 20.

Fan-Furnace Systems: Automatic fan-furnace systems for winter air conditioning and summer ventilation. These installations clean, heat and humidify the air; auxiliary units will provide cooling. Technical data in Chapter 20.

Unit Heaters, Coolers, etc.: Self-contained units—Unit Heaters, Ventilators, Humidifiers, Conditioning and Cooling Units and Attic Fans. Technical data in Chapters 22 and 23.

### AIR SYSTEM EQUIPMENT—Pages 938-1018

The essential parts and accessories for heating, cooling and ventilating systems.

Air Filters and Cleaners: Mechanical and electrical methods of filtering, also air washing and purifying apparatus and their applications. Technical data in Chapter 29.

Humidifying Units: For supplying moisture and controlling its volume. Technical data in Chapter 24.

Cooling Towers and Spray Equipment: For cooling and reclaiming water used in industrial processes and air conditioning. Technical data in Chapter 27.

Heat Transfer Surfaces: As parts of heating and cooling units, and for separate use in industrial and commercial heating and cooling systems. Technical data in Chapter 26.

Condensing Units and Refrigerating Machinery: For cooling purposes in industrial, commercial and comfort air conditioning service. Technical data in Chapter 24.

Fans and Blowers: For use as separate air circulating equipment, or as parts of heating and air conditioning units. Technical data in Chapters 23 and 30.

Motors: Used in conjunction with blowers, fans, stokers, oil burners and other heating, cooling and air conditioning apparatus. Technical data in Chapter 36.

Registers and Grilles: Air diffusion equipment for use with heating, ventilating and air conditioning systems. Technical data in Chapters 31 and 32.

Sheet Metal and Tubular Products: Sheets for air ducts and enclosures; pipes for gas, refrigerants, steam, water, etc. Technical data on air ducts in Chapter 32; on pipe and piping in Chapters 15 and 17.
