NOTICE: If the film image is less clear than this notice, it is due to the quality of the document being filmed.

there's a *Blatchford* metal
for every casting machine

A power in the coming world to be fully used has been the vast mass of the machine civilization for a hundred years past, with the materialists of a century ago, however, who required, perhaps, and practiced the same materialism.

Expenditure has risen so that for each of the last 10 months of working months we have lost more than we have gained. It is well known that government expenditure has increased in the last 10 years, but it is not so generally known that much faster than any other department of revenue that the particular revenue from taxation has increased so rapidly.

learning situation in being a quasi-participant. The factors which created the type of task themselves are in the main related to the method, and not to the question of its being a quasi-participant. The latter is a function of the nature of the task. The latter is a function of the nature of the task. The latter is a function of the nature of the task.

... thus to the mass of the purchased goods of which they were given a half to the other half, it was also necessary to make the corresponding increase of the number of the purchased goods and the number of the purchased goods.

At the same time, many have been forced to give up their homes, and the loss of their homes has been a great hardship for them. The loss of their homes has been a great hardship for them.

money invested in metal . . . is capital outlay

As the steel industry faces a new era of expansion, the industry is expected to invest heavily in new equipment and facilities. This investment is expected to be in the form of capital outlay, which is the money spent to acquire or produce long-term assets.

The steel industry is expected to invest heavily in new equipment and facilities. This investment is expected to be in the form of capital outlay, which is the money spent to acquire or produce long-term assets.

The steel industry is expected to invest heavily in new equipment and facilities. This investment is expected to be in the form of capital outlay, which is the money spent to acquire or produce long-term assets.

Some of the most important factors in the steel industry are the quality of the raw materials and the skill of the workers. The industry is expected to invest heavily in new equipment and facilities to improve the quality of the raw materials and the skill of the workers.

The diagram illustrates the optical system of the camera. The three circular components represent the objective lens, the eyepiece, and the film plane. The central vertical line indicates the optical axis. The horizontal lines represent the field of view and the image plane. The diagram shows how light rays from a distant object are focused by the objective lens, pass through the eyepiece, and are then focused onto the film plane to create a sharp image.

The diagram illustrates the internal components of the camera. The cross-section shows the lens, the shutter, the film magazine, and the various mechanical parts that make up the camera's internal structure. The diagram shows how these components are arranged and how they interact with each other to capture and store a photograph. The labels identify the different parts, such as the lens, shutter, film magazine, and various mechanical components.

keep your metal in prime condition

... use the *Blatchford* metal maintenance service

Your machine's longevity, its safety, productivity, its load capacity, its value, all depend on the condition of its metal parts. Blatchford's metal maintenance service is the only service that provides a complete check-up on your machine's metal parts. We'll inspect your machine's metal parts for wear, corrosion, and other problems. We'll then recommend the best maintenance service for your machine. We'll even provide you with a written report of our findings. So you can keep your machine in top condition for years to come.

Blatchford is set up on a national basis
to Sell metal • Service metal • Smelt dross

No matter where your plant or shop is located, there is a Blatchford Metal Sales Office at hand to meet your requirements. When your metal stock needs servicing, looking for a new place to set up your plant, or if you are looking for a new place to set up your plant, Blatchford is ready to help. If you are looking for a new place to set up your plant, Blatchford is ready to help. If you are looking for a new place to set up your plant, Blatchford is ready to help.
